Summary information

Repository:	Simon Fraser University Archives and Records Management Department
Title:	School of Computing Science fonds
ID:	F-93
Date:	1970 - 1999 (date of creation)
Physical description:	3.63 m of textual records
Dates of creation, revision and deletion:	
Note [generalNote]:	DATE RANGE Predominant dates of the fonds are 1970 - 1991. Only three files contain post-1991 material and these are comprised of a series containing committee records (1992-1994), program brochures (1997), and a research report (1999).

Administrative history / Biographical sketch

Note

The School of Computing Science began in 1973 as a Program in the Faculty of Interdisciplinary Studies. Courses were based on a single-track universal curriculum that focused on the interdisciplinary aspects of computing science, featuring a core of mainstream computing topics together with a techniques sector dealing with applications. Core courses were taught by regular Computing Science faculty while the techniques courses were taught by faculty from other disciplines. The Program offered undergraduate courses leading to a minor, major or honors degree in Computing Science.

In 1975 the Computing Science Program became a department, with nine tenure track faculty. That same year the School began a Co-operative Education Program that continues to place students in 4 and 8 month work-term positions with local, national, and international industries. In 1979 a graduate program was initiated with the approval of both M.Sc. and Ph.D. programs and the first Ph.D. students were admitted in 1983. In 1985, Computing Science joined the newly formed Faculty of Applied Science and became known as the School of Computing Science. The role of departmental Chairman was renamed Director and in 1989 the School was moved to its current space in the Applied Sciences Building.

Over the years, the School's curriculum has developed in response to changing computer technology and faculty research interests focussing on computer theory, hardware and software systems, multimedia applications, databases, and artificial intelligence. The

School now offers a general program leading to a B.Sc. and B.A. degree with major or honors in Computing Science and specialist programs leading to a B.Sc degree with a major in Computing Science. It also contributes to a wide variety of programs that combine studies in other academic disciplines. Formal joint programs consist of Joint Major in Information Systems in Business Administration and Computing Science; Joint Major in Molecular Biology and Biochemistry and Computing Science; Mathematics and Computing Science Joint Honors Program; Cognitive Science Program (in cooperation with the Departments of Linguistics, Philosophy, and Psychology); and the Management and Systems Science Program (in cooperation with the Department of Mathematics, the Department of Economics, and the Faculty of Business Administration).

The school also offers a minor program that can be taken in conjunction with other major or honors programs or a general degree program. Other programs include Digital Systems Design Honors (established in 1981), a Bachelor of General Studies Minor, the Second Degree Program, and the Certificate Program that provides part and full time students an opportunity to obtain an understanding of the fundamentals of computers and programming without specializing in Computing Science. The School continues to offer a non-credit summer Computer Institute for high school students and teachers.

Current research computing facilities at the School include over 300 networked workstations, file servers, CPU servers and other specialized systems. Undergraduate computing facilities include the Computing Science Instructional Lab (CSIL) that provides computers for students to do coursework assigned to particular software platforms. The School of Computing Science operates several interconnected Local Area Networks in cooperation with other schools in the Faculty of Applied Sciences and the Centre for Systems Science (CSS). The Laboratory for Computer and Communications Research (LCCR) is a separate lab operated in cooperation with the Department of Communications. Established in 1982, the LCCR promotes inquiry into the problems of computing and communication research; fosters cooperative efforts between the university, industry and government agencies; and sponsors distinguished visitors.

Custodial history

The records were transferred to the Archives over four accessions between 1999 and 2003.

Scope and content

The fonds consists of records relating to the activities of the School and its predecessors. Activities and events documented include the evolution of the School's structure, functions and governance; deliberation of committees; correspondence of the Director with staff, faculty, university departments and external organizations; grants, scholarships, and research projects; computing laboratories and facility files; curriculum development and course files.

Records include budget and financial working papers; correspondence and reports; meeting agendas, minutes and supporting papers; policies and procedures; course

proposals and outlines; lecture notes and planning materials; and publications including course guides, brochures, student society newsletters and annual reports.

Notes

Title notes

- Source of title proper: Title of the fonds is based on the name of its creator.

Arrangement

The arrangement of the fonds into series and subseries was provided by the Archivist in July 2004. Series 7, subseries 2 (Curriculum files) is based on the creator's original groupings. Other series were established by the archivist to provide structure to the bulk of "general subject files" transferred by the creator.

Restrictions on access

The fonds includes records containing personal information. Access to these files may be restricted in accordance with the provisions of British Columbia's Freedom of Information and Protection of Privacy Act (RSBC 1996 c. 165). Files marked 'pending review' must be reviewed by an archivist prior to release, and as a result of the review access restrictions may apply. Please see the file lists and consult the archivist for more details.

Finding aids

File list is available.

Related material

For records relating to the School's tenure in the Faculty of Interdisciplinary Studies, see fonds F-23 (subseries 23-3-4) and for tenure in the Faculty of Applied Sciences, see fonds F-154 (not processed to date).

Accruals

All accessions have been processed as of July 2004. Further accruals are expected.

Series descriptions

Series F-93-1: School history and structure files

Date: 1971 - 1986 (date of creation)

Scope and content:

Series consists of records relating to the evolution of the School, its internal organization and mandate, scope of activities, and reorganization as part of the Faculty of Applied Science in 1985. Activities, events and topics documented include program planning in the early 1970's, departmental profile and formal review. Records include correspondence, reports, planning documents, notes and working papers.

Physical description: 9 cm of textual records

Arrangement:

This series was created by the archivist in July 2004 to provide structure to the creator's general subject files. Files are arranged alphabetically.

Restrictions on access:

Access to files containing personal information may be restricted in accordance with the provisions of British Columbia's Freedom of Information and Protection of Privacy Act (RSBC 1996 c. 165). Files marked "pending review" must be reviewed by an archivist prior to release, and as a result of the review some files may be restricted in accordance with the FOI/POP Act. Please see the file lists and consult the archivist for more details.

Finding aids:

A file list is available.

Accruals:

Further accruals to the series are expected.

Series F-93-2: Administrative files

Date: 1975 - 1989 (date of creation)

Scope and content:

Series consists of records relating to the administration of the School office and management of relations with non-academic employees. Activities, events and topics documented include capital budget planning; search for School chairman; enrollment and registration issues; fundraising; faculty workshops and retreats; the appointment of Teaching Assistants and Sessional Instructors; space requirements and the move to the Applied Sciences Building.

Records include budgets, correspondence and reports, capital equipment requests, planning documents, notes and working papers.

Physical description: 19 cm of textual records

Arrangement:

This series was created by the archivist in July 2004 to provide structure to the creator's general subject files. Files are arranged alphabetically.

Restrictions on access:

Access to files containing personal information may be restricted in accordance with the provisions of British Columbia's Freedom of Information and Protection of Privacy Act (RSBC 1996 c. 165). Files marked "pending review" must be reviewed by an archivist prior to release, and as a result of the review some files may be restricted in accordance with the FOI/POP Act. Please see the file lists and consult the archivist for more details.

Series F-93-3: Committee files

Date: 1972 - 1994 (date of creation)

Scope and content:

Series consists of records relating to meetings and deliberations of departmental, faculty, university, and external committees in which faculty or representatives from Computing Science participated. Departmental activities, events and topics documented include meetings; faculty search, hiring, and tenure deliberations; computing facilities; curriculum development; undergraduate and graduate programs; and hardware and software acquisition. Faculty records include minutes of the Faculty of Applied Science Executive Committee and the Faculty of Interdisciplinary Studies Executive Committee. University-wide records consist of minutes and papers from committees such as academic planning, computer policy and planning, and research policy. External committee records include minutes and papers of the British Columbia Computers in Education Committee and the Canadian Computer Science Department Chairmen Committee.

Records include meeting agendas, minutes and supporting documents; correspondence; reports; policies and procedures; program revisions and course proposals; and working papers.

Note that in the case of departmental committees, the files constitute the original, authoritative records of those committees. In the case of non-departmental committees (faculty, university and external), however, the School did not typically function as the official record-keeper or custodian of the committee's original records. Accordingly,

these files document the School's participation in the committees (correspondence and copies of committee records) rather than representing the authoritative record of those committees.

Physical description: 85 cm of textual records

Arrangement:

This series was created by the archivist in July 2004 to provide structure to the creator's general subject files. Each committee has been assigned a separate sub-series. Committees have been grouped into the following types: Departmental, Faculty, University and External. Within each sub-series, files have been arranged alphabetically.

Restrictions on access:

Access to files containing personal information may be restricted in accordance with the provisions of British Columbia's Freedom of Information and Protection of Privacy Act (RSBC 1996 c. 165). Files marked "pending review" must be reviewed by an archivist prior to release, and as a result of the review some files may be restricted in accordance with the FOI/POP Act. Please see the file lists and consult the archivist for more details.

Finding aids:

Series F-93-4: Director's correspondence files

Date: 1972 - 1986 (date of creation)

Scope and content:

Series consists of records relating to the Chair's/Director's correspondence with school program areas and faculty, other university programs, and external (non-university) individuals and organizations. Activities, events and topics documented include technical reports, graduate and undergraduate curriculum development, Faculty Association meetings and case files, interdisciplinary program development with other faculties, SFU's Speaker's Bureau, Student Society, involvement with professional organizations, and Ted Sterling's cancer research.

Records include correspondence, reports, notices, letters, budgets, proposals and working papers.

Physical description: 29 cm of textual records

Arrangement:

This series was created by the archivist in July 2004 to provide structure to the creator's general subject files. Correspondence has been grouped into the following sub-series by type: Departmental, Faculty Association, University, External. Within each sub-series, files are arranged alphabetically.

Restrictions on access:

Access to files containing personal information may be restricted in accordance with the provisions of British Columbia's Freedom of Information and Protection of Privacy Act (RSBC 1996 c. 165). Files marked "pending review" must be reviewed by an archivist prior to release, and as a result of the review some files may be restricted in accordance with the FOI/POP Act. Please see the file lists and consult the archivist for more details.

Finding aids:

A file list is available.

Accruals:

Further accruals to the series are expected.

Series F-93-5: Project, research and grant files

Date: 1981 - 1987 (date of creation)

Scope and content:

Series consists of records relating to grants, scholarships and awards prepared or received by faculty members during the course of university-wide, national and international research. Included are funding applications for Simon Fraser University President's Research Grant Stipend, Natural Sciences and Engineering Research Council (NSERC), Social Sciences and Humanities Research Council (SSHRC) and the Science Council of British Columbia. Noted research projects include the Canadian Society for

Fifth Generation Research; proposal for a National Microelectronics Facility; a joint proposal by Computing Science, Engineering Science and the Physics Department; and planning for a site visit to SFU by NSERC.

Records include grant application forms and policies, proposals, financial budgets, correspondence, reports, minutes, faculty curriculum vitae, working papers, statistics, contracts and agreements.

Physical description: 10 cm of textual records

Arrangement:

This series was created by the archivist in July 2004 to provide structure to the creator's general subject files. Files are arranged alphabetically.

Restrictions on access:

Access to files containing personal information may be restricted in accordance with the provisions of British Columbia's Freedom of Information and Protection of Privacy Act (RSBC 1996 c. 165). Series F-93-6: Computing laboratory, centre and facility files

Date: 1971 - 1989 (date of creation)

Scope and content:

Series consists of records relating to the establishment and operation of computing laboratories and other facilities used by students and faculty for research and coursework completion. Activities, events and topics documented include the Centre for Systems Science (CSS), the Computer Graphic Centre, the Computing Centre, and the proposal for a remote academic terminal. Also included are records on the Computer Assisted Instruction Centre (CAI), Computing Science Instruction Lab (CSIL), and the Laboratory for Computing and Communications Research (LCCR).

Records include correspondence, reports, course files, policies and proposals, and working papers.

Physical description: 22 cm of textual records

Arrangement:

This series was created by the archivist in July 2004 to provide structure to the creator's general subject files. Records related to specific computing laboratories or facilities have been assigned a separate sub-series and files are arranged alphabetically.

Restrictions on access:

Access to files containing personal information may be restricted in accordance with the provisions of British Columbia's Freedom of Information and Protection of Privacy Act (RSBC 1996 c. 165). Files marked "pending review" must be reviewed by an archivist prior to release, and as a result of the review some files may be restricted in accordance with the FOI/POP Act. Please see the file lists and consult the archivist for more details.

Finding aids:

A file list is available.

Series F-93-7: Curriculum and instruction files

Date: 1970 - 1991 (date of creation)

Scope and content:

Series consists of records relating to credit and non-credit instruction offered by the School and its predecessors. Activities, events and topics documented include the evaluation of courses, new course proposals, curriculum rationalization and scheduling, development of Continuing Education courses, cross-listed courses with other departments, Programs of Distinction, Programs of Excellence, seminar and colloquium series, high school computer course development, the Summer Computing Institute, workshops, and the graduate and undergraduate program.

Records include correspondence, reports, course files, working papers, policies, lecture schedules and outlines, reading lists, student self-study guides and handbooks, assignments and essay questions, final exams, directed studies proposals and teaching evaluation summaries.

Some teaching material has been retained (e.g. glossaries, lecture notes), but reprints of articles have not been preserved. The sub-series on "Course files" does not include course administrative records (e.g. enrollment lists, book requisition forms, grade change forms, registration status reports, waiting lists, add/drop forms, lab fee notices). Note that record types found in the files vary considerably from course to course.

Physical description: 1.82 m of textual records

Arrangement:

Series is arranged into sub-series that make a distinction between those files that relate to general curriculum planning and specific course files. The material has been

arranged according to the original filing system of the creator. Course files are arranged chronologically by course number and year.

Restrictions on access:

Some records contain personal information relating to students or faculty. Access to these files is restricted in accordance with the provisions of British Columbia's Freedom of Information and Protection of Privacy Act (RSBC 1996 c. 165). Files marked "pending review" must be reviewed by an archivist prior to release, and as a result of the review some files may be restricted in accordance with the FOI/POP Act. Please see the file lists and consult the archivist for more details.

Finding aids:

A file list is available.

Related material:

For detailed information related to course descriptions and the graduate and undergraduate program, see the course guides, brochures and student handbooks found in "Publications" (series F-93-8).

Accruals:

Further accruals to the series are expected.

Series F-93-8: Publications

Date: 1973 - 1999 (date of creation)

Scope and content:

Series consists of publications created by the School and its predecessors. Material includes annual reports, Computing Science Student Society newsletters, course guides and brochures, graduate studies program guide and student handbook, and research overview report.

Physical description: 5 cm of textual records

Arrangement:

This series was created by the archivist in July 2004 to provide structure to the creator's general subject files. Files are arranged alphabetically.

Restrictions on access:

The files are open with no restrictions.

Finding aids:

A file list is available.

Related material:

For detailed records on courses described in the course guides and brochures, see "Course files" (sub-series F-93-7-2).

Accruals:

Further accruals to the series are expected.

File / item list

Ref code	Title	Dates	Access status	Container
F-93-8-0-0-1	File - Departmental Annual Reports	1981 - 1984	Pending review	93-16
F-93-8-0-0-2	File - Computing Science Student Society newsletters	1976 - 1977	Pending review	93-16
F-93-8-0-0-3	File - Course guides and brochures	1973 - 1997	Pending review	93-16
F-93-8-0-0-4	File - Graduate Student Handbook / Graduate Studies Program Guide	1985 - 1986	Pending review	93-16
F-93-8-0-0-5	File - Laboratory for Computer and Communications Research (LCCR) Annual Report	1987	Pending review	93-16
F-93-8-0-0-6	File - School of Computing Science Research Review / Research Overview	1990 - 1999	Pending review	93-16
