

## **SFU Press Releases Collection**

These archival copies have been generated from web press releases maintained and originally written by SFU Communications and Marketing. Where possible, an effort has been made to preserve the public comments left on the website as well as any included photos or other images. All textual content should be faithful to the original press releases; contact numbers have been removed but they have not otherwise been altered in any way. However, this collection of documents spans multiple generations of web authoring software and not all formatting will be exact.

## **SFU scores funds to develop athletic centre**

A provincial investment of \$20 million will help Simon Fraser University (SFU) continue its tradition of athletic excellence with the construction of a new athletic centre and stadium, Premier Gordon Campbell announced today. "SFU has a proud history of training some of Canada's best young athletes, a history the province wants to help build on as we prepare for 2010," said Campbell. "Supporting athletic infrastructure projects such as this one, which will support a culture of fitness on campus and in the community of Burnaby, is a critical part of our commitment to promote sport and healthy living throughout BC." The project, which SFU estimates will cost a total of \$60 million, consists of two components: A \$50 million athletic centre that would serve as the main facility for recreational sports and competitive athletics as well as an indoor training facility and national high performance-training centre. A \$10 million stadium including a concrete grandstand with partially covered seating for up to 2,000, portable seating for another 2,000, washrooms, team lockers, concession and artificial turf with stadium lighting and a scoreboard.

Once complete, the university predicts the facility will be capable of hosting up to 70 major sporting and non-sporting events a year involving 70,000 participants and spectators and generating \$7 million in revenue. "Our government has come to the table to give this project a head start because we recognize the value of building infrastructure that supports the economic and physical well-being of British Columbians," said Harry Bloy, MLA for Burquitlam. "This multi-sport facility has long been a vision for SFU and I am confident it will prove to be a tremendous legacy for Burnaby and beyond." "Our vision is to make SFU a national training centre for the next generation of Canadian Olympians and internationally competitive athletes," said Michael Stevenson, President of SFU. "With its links to kinesiology, sport medicine, the new Faculty of Health Sciences and the national team coaching that is already in place at SFU on Burnaby Mountain, the national training centre will take advantage of synergies that are necessary to sustaining excellence in athletic training and performance." Provincial funding for SFU's proposed fitness centre and stadium comes from the Major Post-Secondary Sports Training Facilities Initiative, which funds infrastructure projects that provide British Columbians with increased opportunities to participate in sports and physical activity. The 2005/06-2007/08 budget and fiscal plan committed \$60 million towards the Major Post-Secondary Sports Training Facilities Initiative; however, at this time, government has legal authority for six months of spending under Interim Supply. Government will seek legislative approval for the full year amounts in the fall.
