

Physical Geology

Earth Sciences 101

Section: D100

Term: 2003 Spring

Instructor: K.J. Cameron

Further information about this course can be obtained from the instructor, Kevin Cameron, in P9318 (Phone 604-291-4703 or e-mail kjc@sfu.ca) or from the Earth Sciences General Office, P 9304 (Phone 604-291-5387)

Discussion Topics: Geology is the science that studies Earth - how it was formed, how it evolved, how it works, and how we can help to preserve it. EASC 101 is an introductory course to the Earth Sciences that has been designed both as a foundation course for Earth Science majors and as a terminal course for those in other disciplines. Lectures investigate geologic theory, while laboratory classes focus on "hands on" exercises emphasizing rock and mineral identification, Earth structure and processes. Attendance at a one-day field trip late in the semester is required to obtain credit for the course.

PLEASE NOTE: Students with credit for Geog 112 cannot take this course for further credit.

Course Topics

Understanding Earth as a System

Minerals: Crystal structure, common rock-forming minerals

Igneous rocks: Magmas and volcanism

Sedimentary rocks: Weathering and erosion, sedimentary environments

Metamorphic rocks: Metamorphic environments

2. Surface Processes

Rivers, Oceans, Glaciers, Winds and Deserts

Landscape Evolution

3. Structure of the Earth

Geologic Time and Rock Deformation

Earthquakes and plate tectonics

Physical Geology

4. Earth Resources

Groundwater, energy and minerals

Course Organization

1 two-hour lecture and 1 three-hour laboratory per week.

There will be a compulsory one-day field trip along the Howe Sound-Whistler corridor on Saturday, November 16th, 2002.

Grading:

Required Texts: Tarbuck, E.J and Lutgens, F.K. 2002. Earth -- An Introduction to Physical Geology, 7th Edition, Prentice-Hall, New Jersey.

Laboratory Manual

The EASC laboratory manual is required for the course and can be purchased (\$15) at the first lab.

Recommended Texts:

Materials/Supplies:

Prerequisite/Corequisite:

Notes:

This outline is derived from a course outline repository database that was maintained by SFU Student Services and the University's IT Services Department. The database was retired in 2014 and the data migrated to SFU Archives in 2015.
