

Introduction to Mathematical Economics

Economics 331

Section: D200

Term: 2013 Fall

Instructor: B. Antoine

Discussion Topics: The course develops the mathematical tools of matrix algebra and calculus and shows how these tools may be used in doing economic analysis. More specifically, topics that will be covered include matrices, determinants and inverse matrices; continuity, derivatives, partial derivatives, unconstrained and constrained optimization of functions of several variables.

Grading: The course grade is based on five written assignments (20% total), one midterm (30%) and a final (50%).

Required Texts: Essential Mathematics for Economic Analysis - Fourth Edition (2012, Prentice Hall) By Knut Sydsaeter and Peter Hammond

Recommended Texts: Mathematics for Economists Second Edition (2001, MIT Press) By M. Hoy, J. Livernois, C. McKenna, R. Rees and A. Stengos

Materials/Supplies: None

Prerequisite/Corequisite: ECON 201 or 301, 60 units. Students with credit for MATH 232 or 251 cannot complete this course for further credit. Quantitative

Notes: ****NO TUTORIALS DURING THE FIRST WEEK OF CLASSES****

Students requiring accommodations as a result of a disability must contact the Centre for Students with Disabilities at 778-782-3112 or csdo@sfu.ca

All students are expected to read and understand SFUs policies with regard to academic dishonesty (S 10.02 and S 10.03). These policies are available at the following web address: www.sfu.ca/policies For more information about SFU Economics, please visit our website: www.sfu.ca/economics

This outline is derived from a course outline repository database that was maintained by SFU Student Services and the University's IT Services Department. The database was retired in 2014 and the data migrated to SFU Archives in 2015.
