**Disclaimer:** This material was transcribed by BC Hydro from 35 year old cassette tapes that contained highly variable audio quality. While significant effort was expended to render these transcripts as accurate as reasonably practical, many comments, questions and responses were unclear or inaudible. As a result, the enclosed transcripts are not a full disclosure of the Jan – April 1974 lectures. Readers that require the most complete understanding of these lectures are advised to review the originating tapes themselves, and/or the digital conversions which were requested and funded by BC Hydro. The latter can be reviewed in the SFU Archives located at the Burnaby Mountain campus.

If and when significant transcription errors are identified which impact the information conveyed, readers are asked to forward the correction to Doug Robinson at [douglas.robinson@bchydro.com](mailto:douglas.robinson@bchydro.com), or fax to 604-528-8149.
